EDUCATION

2025 - Present	Dual Master's Degree in Telecommunication Engineering and Internet of Things (IoT) Universidad Carlos III de Madrid (UC3M) - Madrid • Currently in the second year of the program. • Specializing in emerging technologies, smart networks, and scalable, secure next-generation communication systems. • Expected Graduation: July 2027.
2021 - 2025	Bachelor's Degree in Telematics Engineering, Universidad Carlos III de Madrid (UC3M) - Madrid • Advanced coursework in network protocols, network architectures, telecommunications, and software engineering. • Hands-on experience in Linux-based environments, Cisco router configuration, virtualization, and simulation (MATLAB).

WORK EXPERIENCE

2025 - Present	Project / Software Technician (Junior Engineering Intern), Sistemas y Redes Telemáticas (SIRE S.L.) - Madrid • Participated in the development and validation of critical software for high-reliability railway systems under the CENELEC EN 50128 European safety standard. • Independently designed and executed unit tests in C using VectorCAST. • Conducted functional code reviews to ensure strict compliance with SIL safety requirements. • Thoroughly documented test progress and traceability using IBM DOORS. • Analyzed test results and reported software bugs, optimizing validation and formalization processes in safety-critical environments.
----------------	--

SKILLS

Programming Languages	Python • Java • C • SQL
Software Development & Automation:	Git • GitHub • Linux • Docker • Flask • REST APIs • n8n
Testing & Requirements:	VectorCAST • IBM DOORS
General Tools	MATLAB • VS Code • Eclipse • Microsoft Excel

LANGUAGES

English	Upper-Intermediate (B2)	Spanish	Native
---------	-------------------------	---------	--------

ADDITIONAL INFORMATION

- Geographic mobility / Willingness to travel and immediate availability.
- Analytical mindset focused on problem-solving, continuous improvement, and cross-functional teamwork.
